

## Optorun Co., Ltd. Financial Results( 2 Q 2020)

# Summary of Q2 FY12/2020 Results

- Financial Highlights (H1 2020)
- Net Sales (H1 2020)
- Orders Received and Order Backlogs (H1 2020)
- Operating Profit (H1 2020)
- Net Sales (Q2 2020)
- Orders Received and Orders Backlog (Q2 2020)
- Operating Profit (Q2 2020)
- Financial Position
- Cash Flow
- Business Outlook

### **Financial Highlights (H1 2020)**

- Net sales declined YoY, largely due to the fact that the sales completion in the previous year has turned this term a period for receiving new orders from the North American smartphone manufacturer. Sales to Chinese customers performed fairly well despite certain negative impact from COVID19.
- Sales for camera lense application were affected by the overall customer bear sentiment for new capital investment.
- Successfully received an order from a U.S. IT company for newly launched ALD equipment as part of our ongoing efforts to address the emerging needs for thin-film deposition in new application such as wide-angle lenses and mini LEDs.
- IoT area (automotive, semiconductors, medical devices, AR/VR, optical communication network) saw overall sales increase.
- Accelerating R&D efforts in the bio-sensor field through joint development with major universities in Japan.

- Achieved progress in LED area with new model equipment.
- New models played a large role in the overall results, accounting for 41% of orders received and 15% of sales.
- Orders received increased by JPY900mn (5%) from H1 2019, resulting in an order backlog increase by JPY4.2 bn.

#### **(Net Sales by Categories)**

#### Net Sales (H1 2020)

- Sales from Vacuum Evaporation Coaters (evaporator) and Sputter Coaters accounted for 50% and 40% respectively of total sales.
- Secured sales in smartphones for backglass casting (for decoration) and camera modules.
- Camera lense-related sales include applications for surveillance and SLR cameras.
- IoT-related sales' ratio surged. Sales of new equipment for optical networks and X-ray FPD scintillators for medical use in particular are worth mentioning.
- Sales for LED chips were also strong.
- Started to observe materialization of tangible orders/sales of a variety of new products, including horizontal sputtering, double-sided sputtering, and equipments for LED and automotive applications.

#### **Orders Received/Order Backlog (H1 2020)**

#### Orders received and backlog

- JPY900mn increase (+5%) YoY.
- Orders consist of 50% evaporators and 40% sputtering equipment.
- In smartphones, orders for high-end camera modules, glass chassis decoration, and 3D cameras increased.
- Orders for IoT are coming from diverse areas, including automotive, biometric, semiconductor, medical device, optical networks, AR/VR, etc..
   In particular, witnessing strong customer traction in new types of equipment for optical networks.
- Acquired orders for new ALD equipment.
- LED-related orders were also solid.

#### **Operating Profit (H1 2020)**

#### • Operating profit margin: 22.0% (down 5.7% from H1 2019)

- Cost ratio was unchanged YoY.
- The consolidated CGS-Sales ratio remained favorable at 59.9%.
- The SG&A ratio rose 4.7% YoY due to sales decline.

R&D expenses were JPY1.7bn, up by JPY230mn (+15.7%) YoY, with an aim to accelerate technology development to capture market needs.

#### Net Sales (Q2 2020)

- Q2 Sales were up by 42% from Q1, with evaporators accounting for 50% and sputtering equipment 40% of total sales.
- Solid sales for backglass casting (for decoration) and camera-related products (IR-cut filters and back-glass surface deposition) for smartphones.
- For camera lenses, sales of IR-cut filters and in-vehicle camera modules were secured.
- Overall sales were strong in the areas of IoT, optical communication networks , medical applications, and LED.

#### **Orders Received and Order Backlog (Q2 2020)**

**Orders received and backlog** Orders received Order Backlog (Million 50,000 38,203 40,000 34,755 32.468 32,043 30,532 30,000 27,435 20,000 14,103 12,573 11,191 10,000 6.790 6,304 3,976 0 2019/12 2019/12 2019/12 2019/12 2020/12 2020/12 1Q 2Q 30 40 10 2Q

- Significant impact of global economic downturn was felt this quarter, with orders declined by 50% from Q1.
  However, the rate was +5% for the six months from the beginning of the year.
- Secured orders from Chinese smartphone manufacturers.
- IoT-related products enjoyed solid incoming orders, particularly in the optical communications, automotive, biometric, AR/VR and medical equipment where new model equipment, including horizontal and double-sided sputtering tools played significant roles.
- New order for ALD equipment were also received for the first time.

### **Operating profit (Q2 2020)**

- Operating profit margin: 20.9%
- CGS/Sales ratio increased by 3.5% from the previous quarter due to lower sales proportion of sputtering equipment among the sales mix.
  - SG&A expenses were JPY1.7bn (decreased by 0.8% from Q1).

#### **Business Outlook**

- The spread of COVID-19 has been affecting our overall group business. Due to the downturn of the world economy, new capital investment has been restrained, resulting in order decrease.
- On the other hand, demand for general-purpose optical thin films is on a recovery trend, which could turn into a higher demand for the high-end optical thin films we deal with over time.
- Since it will take some time to determine the outlook for our future business, we are maintaining our 2020 financial forecast. In the event that it becomes necessary to revise the forecast in light of the future business environment and business performance, the Company will promptly disclose such revisions.
