

## **Inkjet equipment has been put into operation in Nano-Lithotics Technologies Inc.**

Nano-Lithotics Technologies Inc. (“NLT”), a consolidated subsidiary of Optorun Co., Ltd. (“Optorun”), has completed renovation work on its clean room, and has officially started the operation of inkjet equipment.

In the future, we will keep perfecting the verification environment for microfabrication nanoimprint equipment, replica mold manufacturing equipment, mid-sized inkjet equipment, evaporation equipment, etching equipment, etc. To respond to markets’ demands such as various material coating processes and microfabrication nanoimprint processes, we are committed to providing “mass production solutions for coating + microfabrication + coating/etching processes” with a sense of speed.

Through NLT, Optorun aims to become a company that could contribute to the society by engaging in the development of optical devices which connect the present to the future, such as meta surface related technologies and smart glasses.
